FLEECING THE JERSEY CITY TAXPAYERS.

What the Board of Aldermen Did Yesterday-How the Public Money is Voted Away-Lively Debate on the Printing and Salary Those who attended the session of the Board of

Aldermen in Jersey City yesterday in the expectation that an investigation would be called for in reference to the doings of some of the mem, bers recently were doomed to disappoint-ment. The subject was not broached at all in the Council, except in a whisper. Mayor O'Neill, to whom was entrusted by ordinance the nomination of the Board of Education, sent in the following names:-First ward, Bennington F. Randolph, A. H. Wallis; Second ward, John H. ward, ex-Mayor S. D. Harrison, John R. Halliday, Fitteenth ward, John C. Westerveit, Charles A. De Witt; Sixteenth ward, Robert L. Smith, Hugh H. McKay.

Several Aldermen arose and declared that the men nominated from their wards could never meet with their approval or that of their constituents.

Alderman CAMPELL stated that one of the nominees could not write two intelligible sentences, and such a man could not be entrusted with the educational interests of the city. This method of appointment was radically wrong, and the sooner the Aldermen retraced the false step they made in this matter the better for the interests of the citizens. A motion to confirm the nominations was rejected and the question was postponed for one week.

Then came the salary ordinance, which gave rise to an animated discussion, seven or eight members webenmently opposing the adoption of certain Items as extravagant and a waste of the public money. The following salaries were adopted:—Mayor, \$3,000; City Judge, \$2,500; Overseer of the Poor, \$1,200; Chief Engineer of the Fire Department, \$1,500; Corporation Counsel, \$2,800; Corporation Attorney, \$1,800; Street Commissioner, \$1,500; to each Assessor, \$800; City Clerk, \$4,000; for assistants whom C.ty Cierk will require, \$5,500; City Marshal, \$1,500; Sergeant-at-Arms, \$1,200; Comptroller, \$3,000; City Physicians, each \$300; Engineers of Steam Fire Engines, each \$1,000; Clerk to Fire Commissioners, \$600; Clerk to the Mayor, \$1,200; to the publishers of the official papers, each \$1,000; Judges of Election, each \$15; Clerks of Election, each \$17; Police Justices, each \$2,000; School Superintendent, \$2,600; Assistant Poormasters, each \$500; and lastly, to each Alderman \$1,200.

THE CIGAR MAKERS' STRIKE.

Meeting of Union No. 90-Great Circle Sailing on the Platform-Adoption of Modifica-The monthly meeting of the Cigar Makers' Union

No. 90 was held at the Turner Hail, Orchard street, last evening-President, Mr. Kuhm; Secretary, Mr.

Plate. It was distinctly understood that the impor tant question to be discussed was the means to be adopted in reference to the present strike. The members of the Union being all German, or at least the majorit, the broceedings were conducted in all due propriety by the Board. Unfortunately, the members on the floor, some of whom had evidently been holding Pfingst Montag, did not observe matters from the same point of view, and induged in personalities, interruptions and gesticulations that were not alone ridiculous, but prejudicate to the great question at stake. It seemed as if the discussion on the strike itself were studiously avoided, and much time was lost on trifles. Thirty new members were reported and accepted, and a proposal to allow the two members of the Executive Committee four dollars a week for loss of time during the duration of the strike, was accepted. On touching the vital question the President called attention to the outside speeches that had been made in beershops by parties who evidently feared to speak so in meeting. Such conduct was unworthy of men who had any pretence to social standing. Many speeches followed, the main feature of some being to keep up the strike at all risks and fight the bloated capitalists and manufacturers. Others, and by far the most sensible portion, suggested that the resolution lately passed not to accept any reduction should be modified. Mr. Catner especially moved that the modification should consist in establishing a minimum price to serve as a basis, which would tend to remove the great obstacle between the men and the employers. This motion was accepted by a majority, and the matter referred to the executive committee. Before adjourning a vote of confidence was passed to the officers of the Union, referring especially to a recent malicious publication that appeared in the columns of an organ of the fobacco trade. The general tendency throughout the meeting was evidently in favor of using efforts to rennee the effects of the strike, but on a basis of modification only. tant question to be discussed was the means to be adopted in reference to the present strike. AMUSEMENTS.

FIFTH AVENUE THEATRS-"PERNANDE."-This prettiest bijou of a theatre on this Continent has secured in Mr. Daly, manager, who clearly comprehends the special line of business adapted to the house. It is the line of light and elegant comedy, with all the improvements of modern society, fashion and high life, and especially of the modern French school. Such a play was "Frou-Frou," and such a play is the (Warrandell of Flatford Communication Communicati the "Fernande" of Victorien Sardon, presented a this house last night, with these differences, that "Fernande" is even a more interesting play than of characters, incidents and effective situations. brief sketch of the plot will serve here to give the uninitiated reader something of an idea of the piece, as the charcoal outlines serve to give something of an idea of a great painting, leaving to the imagina-tion the filling in of the lights and shades and rich and harmonious colors of the finished picture. The finished picture is this play, with its elegant scenery, costumes and other accessories, as given at this theatre—and a beautifully finished picture it is, too.

"Fernande" is one of those peculiar phases of Parisian life which give a perfect photograph of the Parisian life which give a perfect photograph of the human passions under a French atmosphere. In this play innocence is matched against an insane jealousy and hate such as could only enter the mind of a French woman, and the progress and result of this unequal contest is immed by a master hand. The Countees Ciothide (Miss Fanny Morant) is betrothed to the Marquis André (Mr. George Clarke). The course of true love runs smoothly enough for a couple of years, until the Marquis one evening meets a beautiful young girl, Fernande (Miss Agnes Ethel), at the theatre, and is instantly smitten with the fair unknown. His Mancés suspects something in his altered demeanor towards herselt, and by one of the most ingenious, but also one of the most hazardous, contrivances that ever entered the mind of a woman, she learns from his own lips the story of his inconsistancy. Fernande is the daughter of Madamesenschal (Mrs. Gilbert), who through a series of misfortunes was reduced to the dire necessity of keeping a gambling house. The villain of the play, Roqueville (Mr. De Vere), exercises full control in this house and tyrannizes over mother and daughter in the most ruffianty style. At length, through the kindness of a really good lawyer, Pomerol (Mr. Harkins), they are rescued from their degrading situation and become the proteges of the Countess. The latter treats them with true womanly sympathy and kindness at first, but on discovering that Fernande is the innocent cause of the loss of her lover's affection the kindness of the Countess is turned to hate. She brings around a marriage between the parties, Cohecaling from the Marquis the antecedents of Fernande and persuading the latter that André knows all and is still willing to marry her. After the marriage, in which she had explained fully and frankly her former unhappy position. This letter was purposely withheid by Ciotide, and the curtain falls after it reading on the reconciliation of husband and wife. There are two exceedingly funny characters in the play, both in the b

Chesnire, conductor, 100 persons; Plainfield Harmonic, W. F. Sherwin, conductor, 60 volces; the Mendelssohn Union of New York, Wm. Pond, president, 175 volces, and Dr. Pech's Society of Choirs, nearly 700 volces strong. These are all of Choirs, nearly 700 voices strong. These are all familiar with the oratorios of "The Creation" and "The Messiah." as well as the choruses of Beethoven and Mendelssohn, which it is proposed to give. Thus we are to have a home force of nearly 1,500 voices, who have been in active training the entire winter.

THE GERMAN REPUBLICANS REBELLIOUS.

Meeting of the German Republican Central Committee—Heavy Theatrical Thunder— Party Discipline Nowhere. Yesterday evening the German Republican Central

Committee assembled in special meeting at the Steuben House, the Vice President, Dr. Gellmann, in the chair. Mr. M. Ellinger submitted, as an important point, the necessity for the German republicans ant point, the necessity for the German republicans to have an acknowledged representative "aproad"—
meaning at the representative organizations of the republican party, and for this purpose there should be a special committee. Mr. Lueders, who holds an appointment in the Naval Office, believed that this whole matter had been settled by the discharge, at the former meeting, of the special committee of twelve and the reference of the matter to the Executive Committee. Mr. Schoenhof was of the same opinion as Mr. Ellinger, while Mr. Lueders insisted that the Executive Committee had appointed a subcommittee of five to attend to the subject. The committee of twelve did nothing, what they undertook went against them; but they worked for themselves and tried to rule the Central Committee. Dr. Naumann asked what was meant by "representation," and he was informed by Mr. Edlinger that it was to see to obtain a proper share for the Germans in the distribution of the federal patronage. Dr. Naumann replied that if they would exert weight and influence "inside." they must have weight and influence here at home, and to get this they must work. Did they want to go to Washington to beg for Mr. Griunell who had done nothing for the Germans if by home work they show that they have induce the politicians will come to them, but mere bragging will do nothing. After some remarks by Dr. Hoeber and Messrs. Grasse and Weber, who moved to refer the matter to the Executive Committee, Dr. Naumann said he would "fet the cat out of the bag;" that some people smelt that affairs in the Custom House are shaky, and would take this opportunity to show their own importance for personal ends. Some rather angry words fell between the last speaker and Dr. Hoeber, when Mr. Sigismand Kaufmann arose to state that the question of patronage was the most disgusting element in party politics. If things went on as now, it would radicate that the republican, as row of or otten, trading politicians, whom the Germans no longer recognize as the central organiza to have an acknowledged representative "aproad"— meaning at the representative organizations of the

The LIFE SUSTAINING ORGANS.—THE TWO organs which immister most directly to the support of the body are the stomach and liver. In the former the first process of digestion taxs place, under the action of that powerful solvent, the gastric julee. Thence the food, converted into a pulp, passes into the duodeum, where it is subjected to the action of the bitle or gall flowing from the liver, and of the full generated by the pancreas or sweet-bread of the system. These secretions are subjected to the action of the bitle pancreas or sweet-bread of the system. These secretions and the tentucy is discharged through the secretion of the three hosorbent vessels and conveyed into the taken up by the absorbent vessels and conveyed into the taken up by the absorbent vessels and conveyed into the taken up by the absorbent vessels and conveyed into the taken up by the absorbent vessels and conveyed into the taken up by the absorbent vessels and conveyed into the same so of circulation in the form of venous blood, while the waste matter is discharged through the bowles. Unless all these processes are duly performed disease of some sort is in evitable, and the best of some sort is inevitable, and the best of some sort is inevitable, and the best of the three organs—the stomach and greating the action of the litters is no less important in the resultant properties of the situation of the litters is no less important in cases of this kind than its tonic effect upon the stomach and the billary gland. Beauty of person, as well as health, depends in no small degree upon the resultarity of the exception from an and degree and maily banish these obnoxious symptoms, while invigorating the stomach and promotting healthy action in the liver. This genial vegetable stomachic and alterative strikes at disease in its primary sources, the assimilating, secretive and expunsive organs, and the cures it effects are consequently thorough and complete.
